What are the risks and what could I get in return?

Summary Risk Indicator

The summary risk indicator is a guide to the level of risk of this Fund compared to other funds. It shows how likely it is that the Fund will have a negative return because of movements in the markets or because the insurer is not able to pay you through the policy that is connected with this Fund. We have classified this Fund as 2 out of 7, which is a low risk class. This classification takes into consideration two elements: the market risk and the credit risk. The market risk rates the potential losses from future performance and the credit risk estimates the likelihood that the insurer will not be able to pay you in poor market conditions. Market risk has been classified as a Low2 and credit risk as very unlikely.

Performance Scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 25 years. Markets could develop very differently in the future.

What are the costs?

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the Fund and how well the Fund does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- EUR 10,000 is invested.

Investment EUR 10,000	If you exit after 1 year	If you exit after 10 years	If you exit after 20 years
Total Costs	EUR 665	EUR 2,337	EUR 4,605
Annual cost impact (*)	6.6%	1.9% each year	1.6% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example, it shows that if you exit at the recommended holding period, your average return per year is projected to be 2.73% before costs and 1.14% after costs.

One-off costs upon entry or exit		If you exit after 20 years
Entry costs	5.00% of the amount you pay in when entering this investment.	0.23%
Exit costs	0.00% of the amount you pay in when exiting this investment. We do not charge an exit fee for this product in case you exit at the Recommended Holding Period.	0.00%
Ongoing costs taken each year		
Management fees and other administrative or operating costs	1.00% of the value of your investment per year. This is an estimate based on actual costs over the last year.	1.28%
Transaction costs	0.08% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	0.08%
Incidental costs taken under specific conditions		
Performance fees (and carried interest)	There is no performance fee for this product.	0.00%

What is the Fund's recommended holding period and can I take my money out early?

Recommended holding period: 20 years

The Recommended Holding Period relates to the length of time that you should be prepared to wait for the investment's risk and reward profile to reach a reasonable level with sufficiently high probability. You can disinvest all or part of your investment at any time before or after the recommended holding period, depending on the duration and terms of the insurance product.
