

## NUCLEAR MEDICINE EXAMINATIONS

| EXAMINATIONS                                   | FEEES<br>€ |
|------------------------------------------------|------------|
| <b>CARDIOLOGY</b>                              |            |
| Tetrofosmin stress + rest                      | 405        |
| Dipiridamole                                   | 446        |
| MUGA                                           | 203        |
| <b>SKELETAL SYSTEM</b>                         |            |
| Full study                                     | 203        |
| plus Potential plus SPECT                      | 243        |
| <b>THYROID</b>                                 |            |
| Scintigraphy                                   | 180        |
| Scintigraphy + uptake                          | 203        |
| Ultrasound                                     | 81         |
| Puncture                                       | 131        |
| Parathyroid                                    | 270        |
| <b>RENAL</b>                                   |            |
| Renogram with DTPA                             | 203        |
| Renogram with DMSA                             | 203        |
| Renogram with MAG 3                            | 270        |
| & Lasix / or Captopril                         | 45         |
| Renogram with measurement of renal function    | 261        |
| Only measurement of renal function Cr -51-EDTA | 122        |
| Cystography direct                             | 203        |
| Cystography indirect                           | 144        |
| Testicles                                      | 203        |
| <b>RESPIRATORY SYSTEM</b>                      |            |
| Blood flow                                     | 225        |
| Aeration                                       | 203        |
| <b>NEUROLOGY</b>                               |            |
| Blood flow HMPAO                               | 360        |
| DATSCAN                                        | 1.377      |
| <b>GASTROINTESTINAL</b>                        |            |
| HBSS                                           | 270        |
| Meckel                                         | 203        |
| Bleeding search                                | 270        |
| Stomach half evacuation                        | 270        |
| <b>GALLIUM</b>                                 |            |
| Full Body 5mCi                                 | 446        |
| <b>MONOCLONAL ANTIBODIES</b>                   |            |
| Leukoscan                                      | 486        |

UNIVERSAL LIFE

| LYMPHOSCINTIGRAPHY & MAPPING |                   |
|------------------------------|-------------------|
| Lymphoscintigraphy & Mapping | 270               |
| INTRA-ARTICULAR SYNOVECTOMY  |                   |
| Radioactive iodine basic     | 608               |
| Thyrogen                     | 284 + 24 per unit |
| Octreoscan                   | 900               |
| MIBG 131                     | 630               |
| MIBG 123                     | 522               |
