<b>Insurance benefits</b>	In case of death of the insured, the beneficiaries will receive the higher of the Sum Assured and the value of the units that are credited to the policy.

### What are the risks and what could I get in return?

#### Summary Risk Indicator

The summary risk indicator is a guide to the level of risk of this Product compared to other insurance products. It shows how likely it is that the Product will have a negative return because of movements in the markets or because Universal Life is not able to pay you. It could range from 1 to 7, where 1 is the lowest and 7 the highest risk.

The summary risk indicator is based on the assumption that you will retain the product for 30 years. The actual risk may vary considerably if you liquidate at an early stage and you may receive less.

The summary risk indicator of this product ranges between 2 and 3 out of 7, as derived from the respective indicators of the underlying investment options. These indicators correspond to the low and the medium-low class respectively. This classification takes into consideration two elements: the market risk that rates the potential losses from future performance at a low and medium-low level, and the credit risk, which estimates that poor market conditions will likely impact the capacity of Universal Life to pay you.

Specific information relating to each investment option and its respective summary risk indicator may be found in the Informative Note of that individual investment option.

### Performance Scenarios

**Death scenario:** In case of death of the insured, the beneficiaries will receive the higher of the Sum Assured and the value of the units that are credited to the Policy. The value of the units depends on the performance of the underlying investment options that you choose to include in your investment portfolio.

## What happens if Universal Life Insurance Public Co Ltd is unable to pay out?

This Product is not protected by any compensation or guarantee scheme and in the event of default of Universal Life losses could result to your investment.

## What are the costs?

### Range of costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the Product and how well the Product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- EUR 1,000 is invested.

The total costs to the retail investor consist of a combination of the costs of the PRIIP other than the costs of the underlying investment options and the investment option costs and vary on the basis of the underlying investment options.

Investment EUR 1,000	If you exit after 1 year	If you exit after 15 years	If you exit after 30 years
<b>Total Costs</b>	EUR 1,000-EUR 1,022	EUR 1,249-EUR 3,924	EUR 2,208-EUR 14,795
<b>Annual cost impact (*)</b>	100.0%-102.2%	1.6%-3.8% each year	1.1%-3.2% each year

(\*) This illustrates how costs reduce your return during the holding period. For example, it shows that if you redeem at the recommended holding period, assuming you have a 0% return, your return is estimated to be 1.12%-3.24% before expenses and 0.00%-0.00% after expenses.

### Composition of costs

One-off costs upon entry or exit		If you exit after 30 years
<b>Entry costs</b>	<b>0.30%-0.40% of the amount you pay in when entering this investment.</b>	0.30%-0.40%
<b>Exit costs</b>	<b>There is no exit cost for this product.</b>	0.00%
Ongoing costs taken each year		
<b>Management fees and other administrative or operating costs</b>	<b>This encompasses management fees levied by Universal Life, third-party charges, and additional administrative expenses that amount to 0.50%-2.44%. It is an estimate based on the actual charges in the previous year.</b>	0.50%-2.44%
<b>Transaction costs</b>	<b>This encompasses the costs incurred when we buy or sell the underlying holdings of the fund that amount to 0.00%-0.23%. It is an estimate based on the actual charges in the previous year.</b>	0.00%-0.23%
Incidental costs taken under specific conditions		
<b>Performance fees (and carried interest)</b>	<b>There is no performance fee for this product.</b>	0.00%

## What is the Fund's recommended holding period and can I take my money out early?

**Recommended holding period: 30 years**

The Recommended Holding Period relates to the length of time that you should be prepared to wait for the investment's risk and reward profile to reach a reasonable level with sufficiently high probability. You can disinvest all or part of your investment at any time before or after the recommended holding period, depending on the duration and terms of the insurance product.

## How can I complain?
