# **Executive Summary**

Universal Life Insurance Public Company Limited (Universal Life) is an insurance company licensed in Cyprus since 1970 currently transacting life and accident & health business. Universal Life is an established insurance company in the Cyprus market. It is one of the top life insurance companies in Cyprus and the undisputed leader in the local Accident & Health insurance sector with a highly experienced sales force distributing the Company's life and health products. All of the Company's business is conducted in Cyprus.

The purpose of this report is to satisfy the public disclosure requirements under the European Union Directive 2009/138 (Solvency II Directive) transposed into local legislation (Law on Insurance and Reinsurance Services and Other Related Business of 2016) including the EU Delegated Regulation 2015/35 supplementing the above Directive. The elements of the disclosure relate to business performance, governance (including risk management), risk profile, solvency and capital management over the reporting period.

The current year was marked by the Coronavirus outbreak that was declared in March to be a pandemic by the World Health Organisation. The new Coronavirus known as COVID-19 spread rapidly worldwide. In March 2020, the Cyprus government took strict measures so as to confine the spread of the virus and those measures inevitably resulted in a slowdown of the economy. The Company moved quickly to take all necessary actions to protect its staff and customers and to ensure that its operations would continue undisrupted.

During the initial phase of the pandemic the Company was exposed to a significant decline in global markets and the initial shock to consumers led to a short-term reduction in the sale of new policies and an increase in surrenders/lapses. As the year progressed, markets rebounded and consumer sentiment returned so that these effects were greatly reduced. At the time of this report, the government had introduced additional measures to mitigate the effects of a new wave of COVID-19 infections. Therefore, there continues to be some uncertainty regarding the future impact on the Company's profitability, liquidity and solvency ratio, despite the implementation of the national vaccination programme. The Company has conducted a number of scenarios to quantify the possible impacts of the pandemic and in all scenarios the Company's solvency position remained above the minimum level required.

Despite the pandemic, the Company performed well during the year ending 31 December 2020 and managed to record an increase in its pre-tax underwriting profits from the previous year. Profits before tax for the year for both lines of business (Life and Accident & Health) amounted to €7,8m compared with €6,8m in 2019. This was mainly due to strong underwriting gains and successful cost containment within the business, helping to counter-balance the negative impact on overall investment performance.

Over the last few years, the Company, with the supervision and backing of its Board of Directors, strengthened its corporate governance system and established a strong risk management framework, in readiness for the Solvency II Directive which became effective on January 1<sup>st</sup>, 2016. The three lines of defence model is in place and the Board of Directors, which bears the ultimate responsibility for ensuring that Corporate Governance arrangements within the Company are sufficient and adequate, monitors and oversees specific areas of the business through its various committees. The Company's system of governance including the role and responsibility of each Board Committee and key function of the Company as well as

the risk management system is discussed in detail in section B of this report. The Company has a comprehensive set of risk policies and guidelines to ensure that adequate processes and procedures are in place to manage all types of risk in accordance with the current regulatory requirements under the Solvency II regime. There have been no material changes in the Company's governance system compared with the previous year.

The Company's risk profile is driven by the characteristics of its asset portfolio and the nature of its insurance business. Life business is more geared towards long term savings products, with protection cover (death, disability, dread disease) being an important element for parts of the portfolio. The large portfolio of standalone health insurance business is also an important driver of the overall risk profile.

As typified in the standard formula calculations for the Solvency Capital Requirement (SCR), the largest component of the Company's risks is market risk which represents about 53% of the total undiversified basic SCR compared with 55% at the end of the previous year. In order to assess risks and determine capital needs in the foreseeable future, the Company carries out an Own Risk and Solvency Assessment (ORSA) process on an annual basis in which stress testing and scenario analyses are performed to assess the Company's vulnerability to adverse events and its ability to withstand these. According to this process property risk has been classified as having a high significance, as are concentration and liquidity risks both arising from the exposure to local properties. Underwriting risks (life and health) make up about 43% of the total undiversified basic SCR compared with 41% at the end of 2019.

It should be noted that there is a considerable reduction in the market risk capital requirement compared to the previous year. This is due to the termination of a portfolio of unit-linked policies with guarantees and the reduction in the value of properties the Company is exposed to either directly or indirectly through its property subsidiaries. The latter change has also caused a reduction in the Company's own funds.

Overall mortality/morbidity risks were classified as medium impact risks due to the use of appropriate risk mitigation techniques. The major drivers for each type of risk along with each category falling under these are discussed in detail in Section C of this Report.

The capital and solvency position of the Company at the end of 2020 remained strong. All elements of its own funds are of the highest quality (tier 1 capital) and the solvency ratio, being defined as the value of eligible net assets divided by the SCR, as at 31 December 2020 was 171,3% compared with 164,4% as at the end of the previous year. The Solvency Capital Requirement and the Minimum Capital Requirement (MCR) as at 31 December 2020 were €36,3m and €9,1m respectively while the eligible amount of own funds to cover MCR and SCR was €62,1m. As at the end of the previous year, the Solvency Capital Requirement and the Minimum Capital Requirement (MCR) were €39,4m and €9,9m respectively while the eligible amount of own funds to cover MCR and SCR was €64,8m. The Company complied with MCR and SCR throughout the year.

#### A. Business and Performance

#### A.1. Business

#### A.1.1 Name and legal form

**Universal Life Insurance Public Company Limited** ("Company") is a company incorporated, registered and licensed in Cyprus. It is a public company limited by shares. The address of the registered office is:

Universal Tower 85 Dhigenis Akritas Avenue 1070 Nicosia Cyprus

#### A.1.2 Supervisory Authority details

The authority responsible for the Company's financial supervision is the Insurance Companies Control Service of the Ministry of Finance, Cyprus with the following contact details:

Insurance Companies Control Service P.O. Box 23364 1682 Nicosia Cyprus

Tel: (357) 22602990

E-mail: insurance@mof.gov.cy

#### A.1.3 External auditor

The Company's external auditor is PricewaterhouseCoopers Ltd with the following contact details:

PricewaterhouseCoopers Ltd PwC Central 43 Demostheni Severi Avenue P.O. Box 21612 1080 Nicosia Cyprus

Tel: (357) 22555000

#### A.1.4 Shareholders of qualifying holdings

The persons (natural or legal), who were holders of qualifying holdings (10% or more of the share capital) in the Company at the end of the financial year were:

Photos Photiades Group Ltd 54,10% Magnum Investments Ltd 24,77%

# A.1.5 Material lines of business and geographical areas

Universal Life is licensed to carry two classes of business, Life and Accident & Health.

The primary long term business is life insurance providing death, disability and dread disease cover both under pure protection cover type policies (term assurances) and investment type policies (unit-linked and with-profits endowment). The primary short term business is medical expenses or health insurance.

All of its business is conducted in Cyprus.

#### A.2. Underwriting Performance

The underwriting results including income and gains arising from investments for the classes of insurance business transacted by the Company as appearing in the financial statements are shown in the following table. Comparison figures with the previous financial year are also presented.

			Accident & Health		<b>Group Pension</b>	
	Life Business		Business		Business	
	<b>2020</b> 2019		<u>2020</u>	<u>2019</u>	<u>2020</u>	<u>2019</u>
	€000	€000	€000	€000	€000	€000
Gross Premium Income	55.629	53.686	46.447	52.904	4.380	959
Income and gains from investments	(16.439)	13.388	0	3	(999)	1.693
Reinsurance Expenses	(2.444)	(4.047)	(23.964)	(30.852)	0	0
Claims (net of reinsurance)	(41.943)	(32.776)	(7.608)	(10.829)	(264)	(3.381)
Management Expenses and Commissions	(10.357)	(10.599)	(9.652)	(10.611)	(275)	(54)
(Increase)/Decrease in Technical Reserves	<u>17.249</u>	(13.722)	<u>1.104</u>	<u>254</u>	(3.079)	<u>771</u>
(Loss)/Profit before tax	1.695	5.930	6.327	869	(237)	(12)

The decrease in income and gains from investments is a result of the market crisis over the first weeks of the pandemic when the company disposed of a large part of its equity holdings. The implementation of the second phase of GESY caused a reduction in the accident and health premium. Despite the reduction in premium, there was a significant improvement in the profitability of the sector as the claims reduced substantially. The increase in life claims is attributed to an increase in surrenders. Part of the increase was related to the transfer of a unit linked portfolio to group pension business. This transfer resulted in the significant increase in group pension business.

# A.3. Investment Performance

#### A.3.1 Income and expenses arising from investments by asset class

Income and expenses arising from investments by asset class are analysed as follows:

- Investment Properties: Rental income amounted to €130k compared to €151k in the previous reporting period.
- Debt securities (direct holdings): No interest income was earned.
- Equity shares (direct holdings): Dividend income amounted to €247k compared to €387k in the previous reporting period.
- Debt securities (indirect holdings), equity shares (indirect holdings), multi asset funds and money market funds: The Company does not receive income from these investments as the income from the underlying assets is accumulated within these investments with a positive effect on their value.

The Company does not hold any investments in securitisation.

## A.3.2 Overall investment performance by asset class

The overall investment performance in the year (excluding loans) was €18.023k broken down by asset class as follows:

	€000
Investment properties	(6.277)
Debt securities	4.081
Equity shares	(14.601)
Multi asset funds	(1.290)
Money market funds	(8)
Derivatives	<u>72</u>
	( <u>18.023)</u>

# A.3.3 Gains / losses recognised directly in equity

Gains of €530k relating to the revaluation of office properties (and deferred taxation thereon) were recognised directly to equity in 2020 compared to gains €9k in the year 2019.

#### A.4. Performance of other Activities

The Company is the sole shareholder of property company subsidiaries with the exception of Universal Golf Enterprise plc (UGE) where it is a 94.14% shareholder, and it is the sole shareholder of a general insurance agency. The financial performance of these companies led to losses of €5.603k. These subsidiaries in the previous reporting period recorded gains of €562k. The losses in 2020 arose as a result of a decrease in the valuation of UGE's properties (€7.905k), due to the impact of the pandemic and wider negative investor sentiment. None of the subsidiaries had material amounts of income in the year. Additionally there are capitalised expenses of €926k in UGE.

#### **B. System of Governance**

#### **B.1.** General Information on the System of Governance

Universal Life is committed to implementing a sound governance framework, in order to ensure the sound and prudent management of the business and its effective and continuous operation. To achieve this, the Company operates within a set of governance principles, that:

- Establish strategic objectives and a set of corporate values that are communicated throughout the Company
- Set and enforce clear lines of responsibility and accountability throughout the Company
- Ensure that Board of Directors members and senior management are qualified for their positions, have a clear understanding of their role and are able to exercise sound independent judgment about the affairs of the Company and that Fit and Proper requirements are met
- Ensure that there is appropriate oversight of the Company's activities by Senior Management
- Effectively utilize the work conducted by internal and external auditors, as well as other control functions, given their critical contribution to sound governance
- Ensure that compensation policies and practices are consistent with the Company's ethical values, objectives, strategy and control environment
- Conduct corporate governance in a transparent manner
- Continue to balance the needs of its shareholders

The Board of Directors bears the ultimate responsibility for ensuring that Corporate Governance arrangements within the Company are sufficient and appropriate to the size, nature and complexity of its business. The Board of Directors has delegated authority to various Committees that monitor and oversee specific aspects of the business. Delegation to specialized Committees does not in any way compromise the Board of Directors from collectively discharging its duties and responsibilities. Specifically the Board has regular and robust interaction with the Committees, requesting information from them proactively and challenging them when necessary.

#### B.1.1 Board Committees

#### **Risk Committee**

The purpose of the Risk Committee is to assist the Board of Directors in fulfilling its responsibility to exercise due care, skill and diligence regarding:

- Formulation of the Company's overall risk strategies, risk policies and risk appetite.
- Oversight of the Company's risk management framework.
- The adequacy and effectiveness of the Company's risk management system.
- Effective oversight of material risks to which the Company is exposed.

The Committee consists of five Non-Executive Directors, three of whom are independent.

#### Strategy and Development Committee

The Strategy & Development Committee's main purpose is to act as an agile body that examines strategic issues, new opportunities or important developments concerning the Company, as well as deviations from planned course and give quick feedback and guidance to the Executive Management. The Committee is additionally responsible for evaluating the overall strategy proposed by the Chief Executive Officer (CEO) before presenting it to the Board of Directors for discussion.

The Committee consists of four Directors, three Non-Executive, non-independent Directors and the CEO.

#### **Audit Committee**

The purpose of the Audit Committee is to assist the Board of Directors in fulfilling its responsibilities with respect to:

- The financial reporting processes
- The integrity of the financial statements and disclosures
- The compliance with legal and regulatory requirements
- The qualifications, independence and performance of the External Auditors
- The performance of the Internal Audit Department
- The system of internal controls

The Audit Committee consists of five Non-Executive Directors, three of whom are independent.

#### **Remuneration Committee**

The Remuneration Committee makes recommendations to the Board of Directors with respect to:

- The Board Members and Executive Directors' remuneration
- The formulation of remuneration practices that attract and retain Board Members, the Executive Directors and senior management through a remuneration system that supports the strategic aims of the Company

The Remuneration Committee consists of three independent Non-Executive Directors.

#### Nomination & Corporate Governance Committee

The purpose of the Nomination and Corporate Governance Committee is to:

- Identify individuals qualified to become Board members
- Recommend to the Board of Directors nominees for Board membership
- Recommend to the Board of Directors nominees to serve as members of its Committees

- Evaluate the Board of Directors' Committees and make recommendations to the Board for the creation or elimination of Board Committees
- Oversee and evaluate the implementation of the Company's corporate governance

The Nomination & Corporate Governance Committee consists of three Non-Executive Directors, one of whom is independent.

#### B.1.2 Governance Structure

The Governance framework is based on the 'three lines of defence model', in order to support the implementation of a robust internal control system.

#### The 1st Line of Defence – Business Management

Business management makes up the first line of defence. Overall, the first line of defence is responsible for the day to day management of risk and control within the business operations as well as delivering the strategy and optimising business performance within an agreed governance and risk framework.

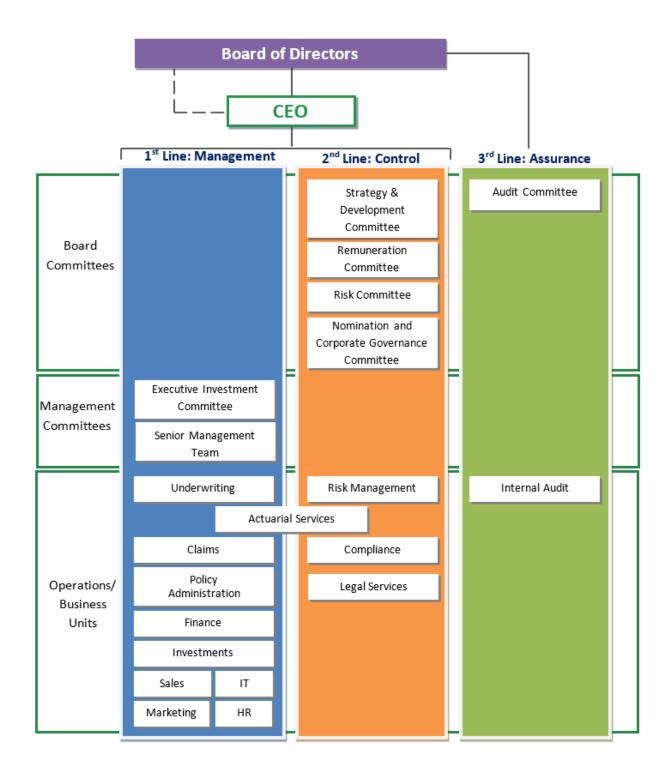

#### The 2nd Line of Defence – Oversight

The second line of defence is made up of the risk management function, the legal services, the compliance function and the actuarial function advising on the technical aspects of risk management and modelling. They provide challenge and oversight on the activities of the first line of defence, hence contributing towards the adequacy and effectiveness of the overall risk management system.

#### The 3rd Line of Defence – Assurance

Internal Audit Function makes up the third line of defence providing independent and objective assurance on the effectiveness of governance and risk management processes and of the internal control system.

The three lines of defence, as implemented in the Company, are presented in the diagram below:

The organizational structure and reporting lines of the Company are designed to:

- Enable apportionment of responsibilities and clear accountabilities and responsibilities
- Facilitate prompt transfer of information to all persons who need it
- Prevent conflicts of interest, in cases where multiple tasks are performed by the same individual or organizational unit
- Ensure the prudent and effective management of the Company

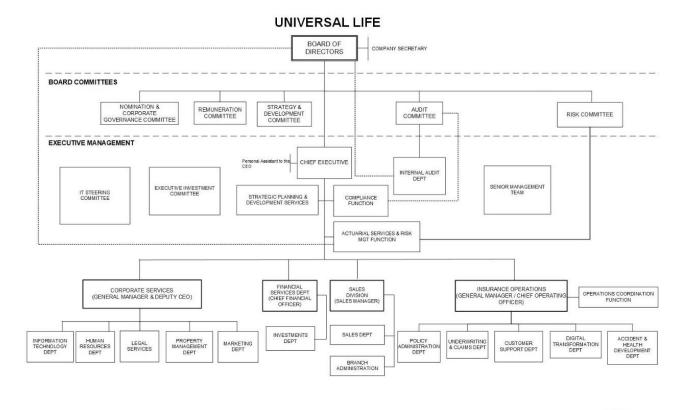

The three lines of defence are embedded within the organizational structure and reporting lines, in order to enforce an effective internal control system.

The Company's ultimate supervisory body is the Board of Directors. The Company's Senior Management, has the day to day responsibility for the implementation of the Board of Directors' approved strategy and reports to the Board through the CEO. Reporting to the Board of Directors is both structured, through planned meetings and regular quarterly reporting and ad hoc as required.

The Business Functions of the Company have the responsibility, through their Head/Senior Managers, for the implementation of the Board of Directors' strategy in their business functions. They report directly to the CEO or the General Managers with regards to their day-to-day duties. In order to minimise the probability of a potential conflict of interest and preserve their operational independence, the key control functions have additional direct reporting lines to the Board of Directors or Board Committees. These additional reporting lines are implemented in order to ensure that these functions have the ability to escalate important issues directly to the Board. Consequently, the Risk Management Function has a reporting line to the Risk Committee, the Actuarial Function to the Board of Directors and the Compliance Function to the Audit Committee.

The Company's Internal Audit provides independent assurance to the Board of Directors. The Internal Auditor reports to the Audit Committee and to the Board of Directors. The Internal Audit Function is administratively independent from all other functions and activities of the Company.

The organizational structure of the Company is presented in the diagram below:

Solvency and Financial Condition Report for the year ending 31 December 2020

#### B.1.3 Main roles and responsibilities of key functions

#### Internal Audit Function

The main responsibility of the Internal Audit Function is to evaluate and improve the effectiveness of the Company's governance and risk management processes as well as internal control system.

The Internal Audit Function evaluates the policies, procedures and systems which are in place in order to ensure:

- The reliability and integrity of information
- The compliance with policies, procedures, laws and regulations
- The safeguarding of the Company's assets
- The safeguarding of the Company's reputation
- The effective and efficient use of the existing resources
- The accomplishment of the set goals and objectives

The Function also provides consulting services and performs special engagements upon request of the Board of Directors, the Audit Committee or the Chief Executive Officer. Special investigations and any other ad-hoc engagements may also be initiated by the Internal Auditor.

The Internal Auditor reports functionally to the Audit Committee and administratively to the Chief Executive Officer.

# **Compliance Function**

The Compliance Function is responsible for ensuring that all actions undertaken by the Company are, at all times, in compliance with all applicable laws and regulations. Its principal role is to identify, assess, monitor and report the compliance risk exposure of the Company.

The Compliance Function reports to the CEO and the Audit Committee.

#### **Risk Management Function**

The Risk Management Function is responsible for the design and implementation of an effective risk management system comprising strategies, processes and reporting procedures necessary to identify, measure, monitor, manage and report to the Board of Directors the risks to which the Company is or may be exposed (underwriting risk, market risk, credit risk, liquidity risk, compliance risk, operational risk etc.). It is also responsible for carrying out the Company's Own Risk and Solvency Assessment (ORSA), which is performed at least annually.

The Risk Management Function reports to the Risk Committee and to the CEO.

#### **Actuarial Function**

The Actuarial Function is mainly responsible to coordinate the calculation of technical provisions, to provide judgment on the reliability and adequacy of the calculation of technical provisions, to express its opinion on the Company's underwriting policy and the adequacy of reinsurance arrangements and to contribute to the effective implementation of the risk management system.

The Actuarial Function reports to the CEO and has direct access to the Board of Directors.

#### B.1.4 Material changes in the system of governance that have taken place over the reporting period

No material changes in the system of governance have taken place over the reporting period.

#### B.1.5 Remuneration policy & practices regarding Directors and employees

The remuneration policy for the Board of Directors members and the senior executive management is reviewed and maintained by the Remuneration Committee. The Remuneration Committee/ Board of Directors are responsible for the implementation of the Remuneration Policy in the Company and specifically its application to Board members, senior management and key function holders and other staff whose professional activities have material impact on the undertaking's risk profile.

The Company's remuneration policy does not include any supplementary pension or early retirement schemes for members of the Board or key function holders.

The Company's remuneration policy for its employees is based on the collective agreement that the Company has signed with the employees' Trade Union to which the majority of employees belong.

The remuneration of all staff employed by the Company complies with the following principles:

- It is in line with the Company's business and risk strategy, risk profile, objectives, values, risk management practices, and long-term entity wide interests and performance
- It reflects the value that each individual adds to the Company
- It is fair and consistent across the business
- It is transparent and adequately disclosed to all members of staff
- It is free from unfair discrimination based on race, gender, age, religion, marital status and ethnic or social origin
- It complies with all tax and regulatory requirements
- The remuneration of employees involved in risk-taking activities such as underwriting, reinsurance ceding or investment management activities does not encourage unauthorised or unwanted risk-taking and is consistent with and promotes sound and effective risk management
- The remuneration structure is not based on short-term results

#### Fixed remuneration

Fixed remuneration is the main element of remuneration and includes salary plus benefits for all employees and is designed to attract and retain talented individuals. Salaries are based on the importance of everyone's role in the Company, experience and market pay levels for similar roles. Benefits given to employees include 13th salary, contribution to the employees' retirement fund, contribution to the employees' medical fund and life and permanent disability insurance.

#### Variable remuneration

Variable remuneration can be given in the form of an annual bonus, according to performance. The bonus is subject to the individual's performance, based on the individual's targets and other performance criteria. In addition, Sales personnel are also entitled to a bonus that is based on sales targets and other related metrics.

# B.1.6 Material transactions during the year with shareholders, with persons who exercise a significant influence on the Company and with members of the Board of Directors

Directors, shareholders, senior management and related parties are beneficiaries of a number of insurance policies for which premiums amount to €701k. Additionally, emoluments of directors and senior management amounted to €429k.

#### **B.2.** Fit and Proper Requirements

To comply with the requirements of the law and the supervisory authority the Company has in place a Fit and Proper Policy that is approved by the Board of Directors and requires that the persons who effectively run the Company or hold other key positions meet specific criteria. The policy is also applied on the selected service providers in case the Company outsources any critical functions. The evaluation of the persons covered under the policy is performed at the beginning as well as annually during their appointment.

The Board of Directors' Nominations and Corporate Governance Committee has the responsibility for the assessment of the persons subject to the provisions of the Fit and Proper Policy. The assessment is performed prior to the appointment to the above positions and in line with the specific criteria, followed by a request to the supervisory authority for approval.

#### B.2.1 Fitness

The evaluation of a person's fitness takes into account their professional competence and suitability in the field of the activities conducted by the Company and the assessment is based on their previous experience, knowledge and professional qualifications.

Criteria for the Members of the Board of Directors, Chief Executive Officer and General Managers

The persons must hold a university degree, or equivalent qualification, or an acknowledged professional qualification in a field relevant to the duties that they will be performing and have a minimum of five years' experience in a managerial position relevant to their position in the company.

Additionally, the Board of Directors must collectively possess professional qualifications, knowledge and experience about:

- Insurance and financial markets
- Business strategy and business model
- System of governance
- Financial and actuarial analysis
- Regulatory framework and requirements

# Criteria for persons holding key positions

The persons must hold a university degree, or equivalent qualification, or an acknowledged professional qualification in a field relevant to the duties that they will be performing and have a minimum of two years' experience in a managerial position relevant to their position in the company.

#### B.2.2 Propriety

For the evaluation of a person's properness the Company considers their honesty, integrity, reputation and financial soundness as well as whether they have been convicted of any criminal offences, have pending cases before the Court or are under investigation by any regulatory or professional bodies.

#### B.3. Risk Management System including the Own Risk and Solvency Assessment

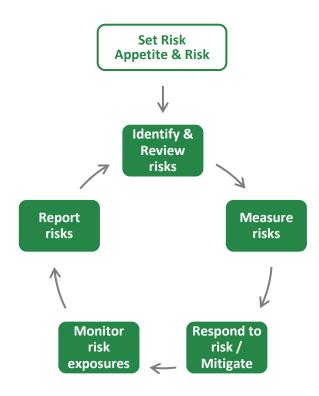

#### B.3.1 Risk Management System and the Three Lines of Defence Model

The Company has developed a comprehensive set of risk policies and guidelines to ensure that adequate processes and procedures are in place to manage all types of risk. These documents are aligned with the current regulatory requirements under the Solvency II regime.

The Company adopts the 'three lines of defence' governance model as described in section B.1.2 above.

#### B.3.2 Risk Management Process

The Company follows a risk management process for all categories which involves all levels of its hierarchy from the Board of Directors down to the business employees. The process and steps are shown in the following diagram:

#### Setting the Risk Appetite and Risk Limits

The risk appetite of the Company is defined as the level of risk exposure or the level of potential adverse impact of an event that the Company is prepared to take or maintain in a given period. The risk appetite defines the size and types of risk that the Company is willing and able to take in order to achieve its mission, vision and business goals. The risk appetite is set by the Board of Directors following a recommendation from the Risk Committee and reflects shareholder aspirations and takes additionally the following stakeholders into consideration:

- Policyholders: The Company's risk appetite takes into account the interests of its policyholders as well as their reasonable expectations
- Regulator: The Company's risk appetite takes into account the requirements of the regulator
- Employees: The Company's risk appetite takes into account the interests of its employees

Individual and aggregate risk limits for every risk area (underwriting, investment, credit, liquidity, concentration, operational etc.) are set within the Company's risk appetite, strategy and business orientation.

#### Identifying and Reviewing Risk

Risk identification is the process followed by the Company to identify and record all material risk exposures that arise from its business activities. Risk identification is performed for both existing and emerging risks. The Risk Management Function of the Company coordinates the assessment of the

existing risk profile with all relevant business users on a regular basis; through this process it is confirmed that all material sources of risk are receiving full consideration as well as whether the materiality of risk has changed since the last review. Any new risk exposures that may have emerged from changes to external or internal factors are also identified through this process.

The identification of emerging risks to the business is performed during the activities undertaken by the relevant business areas. The Risk Management Function monitors the internal and external environment that the Company operates in and identifies potential risks to its strategy. This is performed through monitoring developments in markets where the Company is currently exposed through its investments and insurance business for any potential future adverse development, by assessing the broad social, economic and financial trends worldwide to identify the potential for emergence of risk that is not currently measured or quantified and by analysing the major strategic decisions taken by the Company for identifying any potential impact on the Company's overall risk profile.

#### Measuring Risks

This process is performed on a quarterly basis and is carried out jointly by the Risk Management Function and the relevant business units. Risk measurement is documented in the Company's risk register and is reported to the Board of Directors' Risk Committee. The process is carried out both quantitatively (detailed measurement of the risks involved using appropriate quantification techniques) and qualitatively (high level assessment based on expert judgement, prior experience and estimation of severity and impact of adverse events).

#### Responding to Risk / Mitigating

For each material risk assessed, a risk response is selected. The response can be either to accept risk or to avoid risk or to reduce risk or to transfer risk. Alternative mitigation options are considered and their appropriateness assessed in order to reduce effectively or transfer risk to a third party. The most common form of mitigation technique carried out by the Company is reinsuring insurance risks.

#### **Monitoring Risk Exposures**

All material risk exposures are monitored on an ongoing basis and any risks that fall outside the approved risk appetite of the Company are identified and appropriately escalated to the Board of Directors' Risk Committee. Monitoring risk exposures is based on regular (at least once every quarter) comparison of actual exposures to the risk limits/appetite. Any limit breaches are promptly escalated to the Risk Management Function and to the Board of Directors' Risk Committee. In this process key roles are undertaken by:

- Business Units they directly manage and own their respective risk outcomes and are required to be aware of their exposure levels and limits at all times. Any breaches or near limit breaches are notified to the Risk Management Function. Action plans are prepared for the purpose of exposures returning within the set risk limits; and the
- Risk Management Function it reviews risk exposures to verify that business units have remained within the limits, monitors risk limits and sets the process for adjusting risk limits. Also it supports

business units/risk owners to implement action plans and/or mitigating plans for rectifying risk limit breaches and monitors the progress of these plans.

## **Reporting Risks**

Regular reports (at least per quarter) on the risk exposures are provided by the business units to the Risk Management Function and the quarterly risk profile assessment is reported to the Board of Directors' Risk Committee. Furthermore, ad hoc reporting of risk limit breaches followed by periodic progress reporting of action plans is conducted to the Risk Committee. All action plans in response to a limit breach and relevant approval by the Risk Committee are documented in a consistent manner and are subject to approval by the Board of Directors.

#### B.3.3 Own Risk Solvency Assessment

In calculating its solvency capital requirement, the Company uses the standard formula approach as prescribed in the Solvency II legislation and it assesses that this approach reflects at a reasonable level the size, nature and complexity of the risks assumed by the Company.

As part of the Company's aim to assess risks and determine its capital needs in the foreseeable future an Own Risk and Solvency Assessment (ORSA) is carried out on an annual basis. The ORSA, which is also a legislative requirement, is carried out by the Risk Management Function and is reviewed and approved by the Board of Directors through its Risk Committee.

The ORSA forms an integral part of the management process and decision making framework of the Company and is used in the management of the business as it is a significant tool for understanding the risks the Company is exposed to. In particular, it is embedded in the Company's strategic, operational and risk management processes.

The ORSA is based on adequate measurement and assessment processes in a forward looking approach (at least on a 3 year horizon) and it encompasses all material risks that may have an impact on the Company's ability to meet its insurance obligations. The ORSA considers all risks that may lead to a material reduction in the current level of own funds or the protection offered to policyholders. Any material risks that are assessed not to be fully reflected in the standard approach in determining the Company's solvency capital requirement are particularly addressed in an ORSA exercise and their significance is established and quantified.

The ORSA process involves an assessment of all material risks and performance of various stress tests. These tests (which include sensitivity analysis of single risk factors and scenario analysis of a set of risk factors) are conducted in order to assess the Company's vulnerability to possible events or future changes in economic conditions which have unfavourable effects on its performance, solvency, liquidity or reputation and to determine the ability to withstand such changes. The impact of all stresses is quantified for the projection period in the future (at least 3 years) so as to identify any capital needs during the projection period. Any capital needs identified must be addressed by the Board of Directors and relevant action plans are formulated.

Any significant changes in the Company's risk profile caused by external or internal factors (e.g. introduction of a new line of business) may result in interim assessments (i.e. between the yearly ORSA exercises) taking the form of a full or partial ORSA exercise focusing on areas of significance.

#### B.3.4 Implementation of Risk Management System

The activity comprising the risk management system (as described in previous sections) is carried out by the business units and users (1<sup>st</sup> Line of Defence) within the Company, with the Risk Management Function reviewing and challenging the output.

The Company's Board of Directors is ultimately responsible for taking key decisions across the organization. The output of the risk management system is reviewed by the Board of Directors' Risk Committee (and Audit Committee if necessary) with a summary of key items delivered to the Board of Directors. Following their review the integration of the risk management system in the decision making process is carried through to the business units by the Risk Management Function.

All key decisions made in the Company such as product initiatives and introduction, underwriting and pricing of insurance risks, reinsurance arrangement review, investment strategy, marketing strategy, distribution strategy and capital management follow internal governance processes, which include an assessment of the risk exposure and mitigation strategies.

#### B.4. Internal control system

Taking into account the nature and scope of its operations, the Company has implemented an Internal Control System to manage risks to an acceptable level in order to ensure its efficient operation and the achievement of specific business objectives. The implementation of this system secures, among other things, the assets of the Company and the policyholders' interests, the correctness of transactions, the reliability of financial statements and the compliance with the relevant legislation.

The main procedures governing the Company's internal control system are the following:

- Clear organizational structure and allocation of responsibilities, including oversight and hierarchical approval of transactions.
- Establishment and monitoring of implementation of strategies and business plans and annual budgets for each major activity.
- Effective internal communication lines and reporting of important issues.
- Adoption and promotion of a Code of Conduct and Professional Code of Ethics.
- Regular update of staff through circulars, announcements and trainings for the proper conduct of the Company's policies.
- Effective segregation of duties and avoidance of assignment of duties / responsibilities that might lead to conflict of interests.
- Recording and continuously updating all business and support units' internal procedures.

- Management of investment portfolios under the supervision of the Executive Investment Committee with the support of external consultants.
- Preparation of financial statements and performance statistics on a regular basis.
- Sufficient support of operations with reliable and secure computer systems.
- Performance of audits on a regular basis by external auditors.
- Contingency planning with a comprehensive Business Continuity and Disaster Recovery Plan.
- Adequate insurance coverage for the Company's assets and for other risk (e.g. public liability).
- Implementation of a Risk Management Function.
- Implementation of a Compliance Function.
- Implementation of an Internal Audit Function.

# **B.5.** Compliance Function

The Compliance Function has the necessary standing in the Company and is responsible to ensure that the Company conducts its business operations in compliance with the relevant laws and regulations. It assists the Chief Executive Officer and the Board of Directors to manage effectively the compliance risks faced by the Company.

The Compliance Function reports to the Chief Executive Officer and the Board of Directors through the Audit Committee. It is operationally independent from the Company's business and support units that are monitored and controlled by the function.

The main compliance activities are the following:

- Provision of advice to senior management on regulatory matters
- Communication to senior management of key areas of compliance risk, internal issues, progress and external developments
- Monitoring/overseeing of activities to ensure compliance with relevant legislation and regulations
- Performance of ongoing compliance risk assessment
- Provision of training to staff
- Liaison of the Company with the regulatory authorities on compliance matters
- Reporting to regulatory authorities as required

#### **B.6.** Internal Audit Function

# B.6.1 Implementation of the Internal Audit Function

Universal Life supports Internal Audit as an independent, objective, assurance and consulting activity designed to add value by improving the Company's operations. Its primary role is to help the Board of Directors, the Audit Committee and the Executive Management in protecting the assets, the reputation and the sustainability of the Company. This is done by following a professional approach

in evaluating the effectiveness of the Company's governance, risk management, internal control system and operations, aiming at their improvement.

The Internal Audit Function is implemented through the execution of the Audit Plan. The Internal Auditor prepares an annual risk-based Audit Plan which is reviewed and approved by the Audit Committee. During its execution, the Audit Plan may be adjusted as necessary in response to changes relating to risks, operations, systems or the Company's business. Should the plan significantly change during the year, this will be resubmitted to the Audit Committee for approval.

Through the execution of the Audit Plan, the Internal Audit Function evaluates:

- The effectiveness of the Internal Control System
- The effectiveness of the Company's risk management processes
- The governance processes
- The established procedures for ensuring compliance with applicable laws and regulations
- The existing policies, processes and procedures in order to assess if they are designed in an efficient and effective way and are implemented accordingly in order to help the Company achieve its goals and objectives
- The reliability and integrity of managerial and operational information
- The controls which are in place for safeguarding the Company's assets and where appropriate, their existence is verified
- The effectiveness and efficiency with which the existing resources are employed

The Internal Audit Function also performs consulting activities and special assignments upon request of the Board of Directors, the Audit Committee or the Chief Executive Officer. The Function has also the responsibility to carry out special investigations in situations where fraud is suspected. Any other assignments which are considered necessary by the Internal Auditor and are in line with the scope of the Internal Audit Charter, are also performed.

A report is issued for each internal audit assignment. This includes recommendations for addressing any issues which have arisen, as well as management responses incorporating the corrective action which will be taken and the estimated time for its completion. The report is distributed to the heads of business units involved, to the Chief Executive Officer and to all members of the Audit Committee.

The Internal Audit Function is also responsible for performing the proper follow up actions for ensuring that all issues which have arisen from the internal audit assignments, are resolved through the implementation of the agreed management's actions.

#### B.6.2 Independence and objectivity of the Internal Audit Function

The independence and objectivity of the Internal Audit Function is safeguarded by the way in which it is organized and by the authorities which are assigned to it.

The Internal Auditor reports functionally to the Audit Committee and administratively to the Chief Executive Officer. The Internal Auditor has free and unrestricted access to the Audit Committee.

The Audit Committee reviews and approves the Internal Audit Charter and the proposed annual Audit Plan as well as any staffing requirements and receives the internal audit reports. The Committee also decides about the appointment, replacement or dismissal of the Internal Auditor and evaluates the performance of the Internal Auditor and decides his/her salary and any other benefits.

The Internal Audit Function is not restricted in scope in any way and is empowered by the Audit Committee to audit all and every part of the Company. In carrying out any assignment, the Internal Audit Function, with strict accountability for confidentiality and for safeguarding records and information, has full, free and unrestricted access to all records, IT systems, operations, information, properties and personnel of the Company.

The Internal Audit staff is committed to work to the highest ethical standards by applying and upholding integrity, objectivity, confidentiality and competency. The Internal Audit staff makes a balanced assessment of all the relevant circumstances and they are not influenced by their own interests or by any other party in forming their judgments. If independence or objectivity of the Internal Audit staff is impaired in fact or appearance, the details of impairment are disclosed to the Audit Committee.

#### **B.7.** Actuarial Function

The Company has an in–house actuarial team with fully and partly qualified actuaries who carry out the day-to-day actuarial activities including the calculation of technical reserves.

This team led by the Head of the Actuarial Function also carries out the responsibilities of the Actuarial Function for providing judgment on the reliability and adequacy of the calculation of technical provisions, for expressing opinion on the Company's underwriting policy and reinsurance arrangements and for providing support for the implementation of the Company's risk management system.

#### B.8. Outsourcing

The Company has in place an Outsourcing Policy that is approved by the Board of Directors. It ensures that the development and implementation of any proposal of outsourcing of any type of operation or activity of the Company is carried out in a manner that protects and serves the interests of the Company and its policyholders without reducing the quality of the system of governance or increasing the operational risk of the Company.

According to the policy the Company considers as critical or important all the key functions of the Company's system of governance, i.e. its internal audit, compliance, risk management and actuarial functions. In addition the following activities are considered to be critical or important:

- The design and pricing of insurance products
- Underwriting
- Portfolio management

- Claims handling
- Provision of regular or continuous support on compliance, internal audit, accounting, risk or actuarial support
- Provision of physical and electronic data storage
- Provision of on-going, day-to-day core information systems maintenance or support
- The Own Risk Solvency Assessment process

The policy clearly outlines all parties' responsibilities and describes the process to be followed whenever a business unit identifies the need to outsource critical or important activities or functions. With regards to outsourcing requirements the policy specifically addresses the importance of ensuring effective supervisory access of the outsourced activities by the regulator.

During the year there was no outsourcing of any of the Company's critical activities.

# B.9. Adequacy of the System of Governance

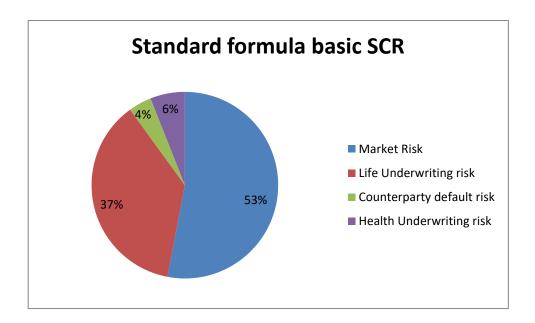

In assessing its system of governance the Company considers that all aspects of the system (as analysed in sections B.1. – B.8. above) are adequate and representative of the size, nature and complexity of the risks inherent in its business.

#### C. Risk Profile

#### C.1. Overall Risk Profile

The Company's overall risk profile is determined by the characteristics of its asset portfolio and the nature of its insurance business. Life business is more geared towards long term savings products, with protection cover (death, disability, dread disease) being an important element for parts of the portfolio. The large portfolio of stand-alone health insurance business is also an important driver of the overall risk profile.

The composition of the elements of the Solvency Capital Requirement (SCR), using the standard approach as prescribed by the legislation, provides a reasonable picture of the Company's risk profile. The following chart demonstrates the basic SCR composition of risks as at 31.12.2020:

# C.2. Underwriting risk

#### C.2.1 Major drivers of underwriting risks

Underwriting risk is the risk of loss or of adverse change in the value of insurance liabilities due to inadequate pricing and provisioning assumptions. This could result from:

- Changes in the level, trend, or volatility of:
  - mortality rates
  - disability and morbidity rates
  - the expenses incurred in servicing insurance contracts
  - the rates of policy lapses, terminations, renewals and surrenders

- Fluctuations in the timing, frequency and severity of insured events, and in the timing and amount of claim settlements at the time of provisioning
- The significant uncertainty of pricing and provisioning assumptions related to extreme or irregular events

Underwriting risk at 31 December 2020 represented 43% of the undiversified basic SCR (Life underwriting risk is 37% while health underwriting risk is 6%) compared to 41% of previous year SCR (Life underwriting risk was 35% while health underwriting risk was 6%).

# C.2.2 Assessment and risk mitigation techniques used for underwriting risks

The Company monitors and controls underwriting risks via various methods, including:

- a. Using reinsurance to reduce exposure to mortality and morbidity risks;
- b. Underwriting to increase the certainty that only insurable risks are accepted and that premiums reflect the unique circumstances of each risk;
- c. The ORSA process which includes stress and scenario testing used to assess the risks under stressed conditions;
- d. Lapse monitoring, which is conducted monthly;
- e. Experience investigations covering expenses and claims, which are conducted at least annually;
- f. Product design and pricing principles aiming to minimise adverse selection and using appropriate factors to differentiate between different levels of risk. For certain products and benefits (e.g. dread disease cover, health insurance) the Company retains the right to review premium rates at regular intervals.

The Company's reinsurance programme in relation to mortality and morbidity risk is on a surplus basis with a maximum retention per life and is split among two of the largest and highest credit-rated reinsurance companies in the world. For the health business reinsurance is on a quota share basis, again with a large and highly credible counterparty.

#### C.2.3 Risk sensitivity for underwriting risks

The Company carries out an assessment process for the materiality of risks as part of its ORSA process. Overall mortality/morbidity risks were classified as medium impact risks due to the use of appropriate risk mitigation techniques. The ORSA process also entails stress and scenario testing carried out for certain material risks projecting the impact on its solvency position over the future business planning period. In the 2020 ORSA, the lapse/expense and expense inflation stresses were carried out and the results showed that the solvency ratio remained well above the minimum level in the projection period and above the tolerance level set by the Board of Directors.

In addition, a stress on the impact of the NHS was carried out. An adverse scenario in which the health portfolio will be heavily reduced over year 1 has been performed. It was assumed that the annual premium of the individual and group portfolios will be reduced by 50% and 75% respectively in year 1. Even under this scenario, the Company is not expected to experience any solvency issues over the next three years.

In the last ORSA, the Company has conducted moderate and adverse stress scenario testing to quantify possible adverse impacts in relation to the current COVID-19 pandemic. Under the COVID-19 moderate stress scenario, the solvency ratio is not expected to fall below the target limit while under the adverse stress scenario the solvency ratio was below the targeted limit but above the minimum level required.

#### C.3. Market risk

# C.3.1 Major drivers of market risks

Market risk arises from the Company's investments in assets and other securities and includes the following categories:

- Interest rate risk: the sensitivity of the values of assets, liabilities and financial instruments to changes in the term structure of interest rates or in the volatility of interest rates
- Equity risk: the sensitivity of the values of assets, liabilities and financial instruments to changes
  in the level or in the volatility of market prices of equities
- Currency risk: the sensitivity of the values of assets, liabilities and financial instruments to changes in the level or in the volatility of currency exchange rates
- Property risk: the sensitivity of the values of assets, liabilities and financial instruments to changes in the level or in the volatility of market prices of real estate
- Spread risk: the sensitivity of the values of assets, liabilities and financial instruments to changes
  in the level or in the volatility of credit spreads over the risk-free interest rate term structure

Concentration risk which arises from risk exposures with a loss potential large enough to threaten the solvency or the financial position of the Company is also reflected in the above categories.

The market risk faced by the Company reduced over the year following the termination of a portfolio of unit-linked policies with guarantees and the reduction in property values. The overseas investments asset portfolio remained well diversified and the Company remains focussed on reducing the real estate component of its local asset portfolio.

Market risk at 31 December 2020 represented 53% of the undiversified basic SCR compared to 55% of the undiversified basic SCR at 31 December 2019.

#### C.3.2 Investment assets and prudent person principles as applied to market risks

Under the prudent person principle the Company's investment decisions are approved by the Executive Investment Committee based on documented recommendations submitted for consideration by the Company's Investment Department. Execution of resulting trades by the Investment Department is monitored by the Accounts Department and routinely reported to the Executive Investment Committee.

The Company follows strict and transparent procedures for the management of investment risk and the evaluation of new investment opportunities.

### C.3.3 Assessment and risk mitigation techniques used for market risks

The Company monitors market risks on a continuous basis through the Investments Department, monthly through Executive Investment Committee meetings and annually through a review of capital market assumptions underpinning strategic asset allocations. Furthermore a risk measurement process is carried out on a quarterly basis by the Risk Management Function where individual and aggregate risk exposures are measured against the risk limits set by the Company's relevant risk policies. In addition, the ORSA process includes stress and scenario testing used to assess market risks under stressed conditions.

The Company does not directly use any derivatives for hedging purposes.

#### C.3.4 Risk sensitivity for market risks

The Company carries out stress and scenario testing as part of the ORSA process which includes stress testing for property risk (the key market risk), equity risk and for a property subsidiary, Universal Golf Enterprise plc, which is in the process of exploring options to launch a residential real estate golf project. For the 2020 ORSA, the solvency position at 31 December 2020 and the projected solvency position over the business planning period were re-calculated following adverse stresses. The analysis indicated that the Company can withstand severe shocks in the foreseeable future with solvency ratios being maintained above the minimum levels. For property related stresses, solvency ratios in the projection period are below the tolerance level set by the Board of Directors but they are still above the minimum level required.

#### C.4. Credit risk

#### C.4.1 Major drivers of credit risk

Credit risk reflects possible losses due to unexpected default, or deterioration in the credit standing, of the counterparties and debtors of the Company including any exposure resulting from reinsurance arrangements. The main categories of counterparty exposure are debts due from subsidiary companies, cash at bank, reinsurance recoverables and premiums due from policyholders. Following the recent changes in regulations, the Company now applies the look through approach on related

undertakings that hold property and hence any debts due from property subsidiaries are excluded from the counterparty default risk calculation.

There were no material changes in the credit risk faced by the Company over the year. Credit risk in the form of counterparty default at 31 December 2020 represented 4% of the undiversified basic SCR.

#### C.4.2 Prudent person principles as applied to credit risk

Under the prudent person principle the Company's reinsurance counterparties are always selected by considering their credit quality so that arrangements lead to effective risk transfer in respect to credit risk too. All reinsurers are rated at credit quality step 1.

# C.4.3 Assessment and risk mitigation techniques used for credit risk

The Company monitors and controls credit risks on a regular basis through exposure reports. Credit ratings (where available) by major credit rating agencies are used to assess credit risks of counterparties.

To mitigate the risk of reinsurer counterparty default the Company selects large, reputable reinsurance companies with credit rating at least A by Standard and Poor's (or equivalent for other rating agencies).

#### C.4.4 Risk sensitivity for credit risk

Credit risk is assessed as not material with low impact in the ORSA assessment process. For this reason no specific stress and scenario testing is carried out for this particular risk.

# C.5. Liquidity risk

#### C.5.1 Major drivers of liquidity risk

Liquidity risk is considered a distinct risk category in the Company's risk framework and risk strategy and it refers to the risk that the Company is unable to realise investments in order to settle its financial obligations when they fall due or is only able to do so at a substantial cost. Liquidity risk arises when there are circumstances where the Company has insufficient liquid or readily realisable assets to meet its commitments and is forced to rely on assets that cannot be realised at short notice at a reasonable value.

Liquidity risk is not captured in the standard SCR formula but the Company pays particular attention to this risk on its daily operations and during its ORSA process. Given the concentration of local property assets, which under current economic conditions are considered illiquid assets, the

Company faces a degree of liquidity risk in the short to medium term and this situation has not changed significantly over the year.

#### C.5.2 Prudent person principles as applied to liquidity risk

The Company is prudently taking into account liquidity requirements in any new investments in asset classes or individual holdings including collective investments. The Company's collective investments are all UCITS compliant, hence all readily realisable.

#### C.5.3 Assessment and risk mitigation techniques used for liquidity risk

Liquidity requirements are assessed on a regular basis (at least monthly) by monitoring the liability profile of the portfolio, lapse, surrender and transfer of funds behaviour of policyholders against the level of liquid assets in the portfolio (and parts of the portfolio, i.e. per fund).

In order to mitigate liquidity risk the Company has identified a number of contingency funding options so that it will properly manage and co-ordinate the actions required to dampen the effects of a liquidity problem should this arise. Also action plans are in place to reduce local property exposure which is the key driver of liquidity risk.

#### C.5.4 Expected profit included in future premiums (EPIFP)

The EPIFP is defined as the difference between the technical provisions (without a risk margin) calculated in accordance with the legislation and a calculation of the technical provisions (without a risk margin) under the assumption that the premiums relating to existing insurance policies that are expected to be received in the future are not received for any reason other than the insured event having occurred (regardless of the legal or contractual rights of the policyholder to discontinue the policy).

The EPIFP of the Company as at 31.12.2020 is €64.179k.

# C.5.5 Risk sensitivity for liquidity risk

As part of the ORSA process, stress and scenario testing is conducted to assess the liquidity risk under stressed conditions during the projection period. These tests indicated that liquid asset shortfalls may arise under stressed conditions and the impact on the solvency position of the Company is quantified by assuming that assets are sold at a significant discount to their fair value (forced sale approach). The projected solvency ratios are expected to remain above the tolerance level set by the Board of Directors.

# C.6. Operational risk

#### C.6.1 Major drivers of operational risks

Operational risk is considered a distinct risk category in the Company's risk framework and risk strategy. It is defined as the risk of loss resulting from inadequate or failed internal processes, personnel or systems, or from external events. Operational risk also incorporates risks resulting from outsourcing activities, regulatory and compliance treatment, continuity of business, Information Technology risk treatment and Information Security and project execution and compliance.

There were no material changes in the operational risk faced by the Company over the year. Operational risk as captured in the standard SCR formula at 31 December 2020 corresponded to 8% of the SCR.

#### C.6.2 Assessment and risk mitigation techniques used for operational risks

Risks are identified across all business and support units and operational risk events are collected. The Risk Management Function of the Company undertakes the task for assessing the materiality of these risks.

The operational risk measurement process will provide the Company with a qualitative approach to assess potential risks of a primarily severe nature by conducting a structured assessment procedure with representatives of all business and support units. The measurement procedure will be carried out for all departments/units of the Company and is performed on an annual basis in cooperation with the Risk Management Function. The measurement of each operational risk is carried out by defining/assessing the potential impact of each risk and the probability of its occurrence, both captured in a 5 level scoring system.

The Company minimises operational risks mainly by:

- a. Having a sound system of governance and risk management framework
- b. Applying sound and robust internal controls
- c. Having in place a comprehensive and regularly (at least annually) updated and tested Business Continuity Plan and Disaster Recovery Plan
- d. Applying rigorous procedures under a comprehensive Information Security Policy
- e. Continuous and effective training of staff and insurance intermediaries
- f. Having a strong compliance culture
- g. Applying a concrete outsourcing policy for critical and non-critical activities

#### C.6.3 Risk sensitivity for operational risk

Operational risk is considered as a low impact risk in the ORSA assessment process. For this reason no specific stress and scenario testing is carried out for this particular risk.

# **D.** Valuation for Solvency purposes

#### D.1. Assets

#### D.1.1 Asset valuation for solvency purposes for each material class of asset

The following table provides the value of assets as at 31.12.2020:

	€000
Deposits and Cash & cash equivalents	28.620
Debtors and prepayments	24.058
Loans and receivables	3.081
Reinsurers' share in insurance contracts liabilities	6.611
Reinsurance receivables	1.848
Premium receivable and other insurance receivables	2.875
Taxation receivable	379
Investment properties	76.921
Debt securities/Bond funds	102.613
Equity shares/Equity funds	49.656
Multi asset funds	6.722
Money market funds	8.500
Investment in subsidiaries	35.372
Fixed assets	<u>17.865</u>
	365.121

Cash and cash equivalents, debtors and prepayments, loans and receivables, reinsurers' share in insurance contracts liabilities, premium receivable and other insurance receivables and taxation receivable are measured at the same basis as IFRS financial statements.

Investment properties are measured at fair value based on valuation models in which data significantly affecting the fair value is not based on observable market data.

Debt securities, equity shares, multi asset funds and money market funds are measured at fair value based on quoted prices in active markets as well as on valuation models in which all factors affecting the fair value are based on observable market data.

Investment in subsidiaries is the fair value of the participation in the subsidiaries.

Fixed assets are measured at fair value or cost less accumulated depreciation.

#### D.1.2 Solvency purposes and financial statements valuation differences by material class of asset

There are no differences between the valuation bases, methods and main assumptions used for solvency purposes and financial statement purposes.

However in the Company's financial statements total assets include intangible assets of €535k and deferred acquisition costs of -€176k that are not included in the balance sheet for solvency purposes. Additionally, reinsurers' share in insurance contracts liabilities for solvency purposes is calculated using a different method compared to the one used for financial statements purposes.

#### D.2. Technical Provisions

#### D.2.1 Calculation of technical provisions for solvency purposes

Technical provisions are calculated based on Solvency II regulation. They consist of the Best Estimate Liabilities (BEL) and the risk margin. BEL are calculated by projecting the expected cash flows associated with the existing insurance contracts and discounting them using the risk-free yield curve prescribed by European Insurance and Occupational Pensions Authority (EIOPA). As at 31 December 2020, the Company did not use matching or volatility adjustments.

The risk margin is the cost of providing an amount equal to the SCR required to support the insurance obligations over their lifetime. It was calculated using method 2 prescribed in the relevant EIOPA's guidelines by approximating the SCR for each future year using best estimate projections.

Technical provisions are calculated gross of reinsurance recoverables. Reinsurance recoverables relate to the amounts recoverable from reinsurance contracts and are calculated separately.

The table below shows the technical provisions by main line of business as at 31.12.20:

€000	Unit-Linked	With Profit	Other Life	Health SLT	Health NSLT	Total
Gross BEL	192.161	32.825	2.103	2.455	9.858	239.402
Risk Margin	21.225	3.626	232	271	263	25.617
Technical Provisions	213.386	36.451	2.335	2.726	10.121	265.019
Reinsurance						
Recoverables	(1.183)	-	(329)	1.410	6.712	6.610
Technical Provisions						
net of Recoverables	214.569	36.451	2.664	1.316	3.409	258.409

Technical provisions are based on assumptions and hence there is uncertainty regarding their value. Actual experience may differ to that assumed when calculating technical provisions. The main assumptions used relate to mortality, morbidity, claims ratio, expenses and lapses.

Mortality assumptions are based on reinsurers' data and the Company's experience while morbidity was solely based on reinsurers' rates. Claims and expense ratios for accident and health business (Health NSLT) are based on the Company's experience.

The expenses related to the life portfolio were analysed and broken down into initial and renewal expenses so as to estimate the renewal expense per policy. Expense inflation is estimated after considering past experience and the long term expectations for future expense inflation.

Lapse assumptions take into account past experience and are adjusted for any expected future changes.

# D.2.2 Comparison of technical provisions for solvency purposes and gross insurance liabilities in financial statements

The table below shows the difference between gross insurance liabilities in financial statements (IFRS insurance liabilities) and technical provisions:

€000	Unit-Linked	With Profit	Other Life	Health SLT	Health NSLT	Total
Gross IFRS insurance liabilities	243.411	30.798	10.430	2.455	14.008	301.102
Adjustments for SII	(51.250)	2.027	(8.327)	-	(4.150)	(61.700)
Gross BEL	192.161	32.825	2.103	2.455	9.858	239,402
Risk margin	21.225	3.626	232	271	263	25.617
Technical provisions	213.386	36.451	2.335	2.726	10.121	265.019

The main differences between technical provisions for solvency purposes and IFRS liabilities are:

- The permissibility of negative reserves under Solvency II (SII).
- The use of realistic assumptions under SII versus prudent assumptions for IFRS
   (i.e. for IFRS expense inflation assumption incorporates a margin, mortality assumption is
   higher and no lapses are assumed).
- Under SII the risk-free yield curve prescribed by EIOPA is used for discounting while for IFRS the weighted average of the yields on assets backing the reserves is used.
- Technical provisions include the risk margin.
- For individual non-linked life contracts, net premium valuation is carried out under IFRS. For accident and health business, unearned premium reserve is calculated under IFRS versus the premium provision under SII that considers all cash flows associated with future claim events.

#### D.3. Other liabilities

#### D.3.1 Other liabilities valuation for solvency purposes for each material class of liability

The following table provides the value of other liabilities assets as at 31.12.2020:

	€000
Bank overdrafts	884
Creditors and accruals	4.195
Outstanding claims	15.164
Deferred tax liabilities	8.543
Reinsurer's accounts	<u>9.186</u>
	<u>37.972</u>

Other liabilities are measured at fair value.

# D.3.2 Solvency purposes and financial statements valuation differences of other liabilities

The Solvency II balance sheet includes a deferred tax liability of €3.600k, arising from the temporary differences between technical provisions under Solvency II compared to those under IFRS (which are not used for income tax purposes).

There are no other differences between the valuation bases, methods and main assumptions used for solvency purposes and financial statements purposes.

#### E. Capital management

#### E.1. Own funds

#### E.1.1 Objective, policies and processes for managing own funds

The objective of own funds management is to maintain, at all times, sufficient own funds to cover the Solvency Capital Requirement (SCR) and with an appropriate margin set by the relevant risk appetite limit set by the Board of Directors. These should be of sufficient quality to meet the eligibility requirements in Article 82 of the Delegated Regulation. Own funds and SCR are reviewed quarterly by the Board of Directors. As part of own funds management, the Company prepares ongoing annual solvency projections and reviews the structure of own funds and future requirements. The ORSA process carried out annually projects funding requirements on a future three year horizon.

#### E.1.2 Own funds classified by tiers

An analysis of own funds as at 31 December 2020 compared to the respective amounts at the end of the previous year are shown below:

Components (all Tier 1 elements)	31.12.2020 €000	31.12.2019 €000
Ordinary Share Capital	14.489	14.489
Share Premium	5.379	5.379
Surplus Funds	407	462
Reconciliation Reserve	41.854	44.471
Total Equity (Own Funds)	62.129	64.801

Over the year the changes in the values of the various elements were mainly influenced by the revaluation of property subsidiaries.

The Company's ordinary share capital, share premium arising on ordinary share capital, surplus funds and reconciliation reserves are all available as Tier 1 unrestricted own funds as per Article 69 (a)(i) of the Delegated Regulation. The ordinary share capital and share premium arising is not subordinated and has no restricted duration. The reconciliation reserve represents retained earnings and reconciliation adjustments from the financial statements balance sheet to the solvency balance sheet.

The Company has no Tier 1 restricted own funds (per Article 80 of the Delegated Regulations), no Tier 2 own funds (per Article 72 of the Delegated Regulations) and no Tier 3 own funds (per Article 76 of the Delegated Regulations).

#### E.1.3 Eligible amount of own funds to cover the Solvency Capital Requirement, classified by tiers

The Company's own funds are all tier 1 unrestricted and available to cover the SCR.

- E.1.4 Eligible amount of own funds to cover the Minimum Capital Requirement, classified by tiers The Company's own funds are all tier 1 unrestricted and available to cover the MCR.
- E.1.5 Difference between equity as shown in the financial statements and the excess of assets over liabilities calculated for solvency purposes

The differences are explained in the following table:

Equity per financial statements:	€000
Ordinary Share Capital	14.489
Share Premium	5.379
Revaluation	10.026
Retained earnings	<u>7.161</u>
Total equity	<u>37.055</u>
Adjustments for Solvency:	
Difference in Technical provisions net of reinsurance	28.626
Difference in value of intangibles	(535)
Difference in deferred acquisition costs	176
Surplus in Life Fund	407
Difference in deferred tax liabilities	( <u>3.600)</u>
Solvency value of excess of assets over liabilities	<u>62.129</u>

- E.2. Solvency and Capital Requirements and Minimum Capital Requirement
- E.2.1 Amount of Solvency Capital Requirement and Minimum Capital Requirement

The total Solvency Capital Requirement (SCR) and the Minimum Capital Requirement (MCR) at 31 December 2020 are €36.266k and €9.067k respectively. The final amount of the SCR remains subject to supervisory assessment.

#### E.2.2 Solvency Capital Requirement split by risk modules

The tables below shows the risk modules that make up the Company's SCR at 31 December 2020:

Risk	Gross SCR €000	Net SCR €000
Life Underwriting	20.795	18.015
Health Underwriting	2.681	2.681
Market Risk	27.042	25.656
Counterparty Default Risk	2.247	2.247
Undiversified Basic SCR	52.765	48.599
Diversification Credit	(13.041)	(12.038)
Basic SCR	39.724	36.561

	€000
Gross Basic SCR	39.724
Operational Risk	2.926
Loss absorbing capacity of Technical Provisions	(2.784)
Loss absorbing capacity of deferred taxes	(3.600)
Total SCR	36.266

Simplified calculations are used for the risk mitigating effect of the reinsurance arrangements in the counterparty default risk module, in the capital requirement for the life catastrophe risk in the life underwriting risk module and in the lapse risk sub-module of the life and health underwriting risk modules.

The Solvency Capital Requirement decreased by €3.142k compared to the end of the previous year. The reduction was driven by the market risk component that reduced considerably over the year following the termination of a portfolio of unit-linked policies with guarantees and the reduction in property values. The loss absorbing capacity of deferred taxes relates to the additional deferred tax liability included in the Solvency II balance sheet, arising from the temporary differences between technical provisions under Solvency II compared to those under IFRS (which are not used for income tax purposes).

#### E.2.3 Inputs used to calculate the Minimum Capital Requirement

The table below shows the inputs into the MCR calculation as at 31 December 2020. It should be noted that the Absolute Floor of the Minimum Capital Requirement (AMCR) is prescribed by the legislation.

	€000
AMCR	6.200
Linear MCR	4.179
SCR	36.266
Combined MCR	9.067
MCR	9.067

# **F. Quantitative Reporting Templates**

The following Quantitative Reporting Templates (QRT) are required to be attached in this public disclosure report:

QRT ref	QRT Template name
S.02.01.02	Balance Sheet
S.05.01.02	Premiums, claims and expenses by line of business
S.12.01.02	Life and Health SLT Technical Provisions
S.17.01.02	Non-life Technical Provisions
S.19.01.21	Non-life insurance claims
S.23.01.01	Own funds
S.25.01.21	Solvency Capital Requirement – for undertakings on Standard Formula
S.28.02.01	Minimum Capital Requirement – Both for life and non-life insurance activity

The templates are presented at the end of this report.

# Independent Auditor's Report

# To the Board of Directors of Universal Life Insurance Public Company Limited

Report on the Audit of the relevant elements of the Solvency and Financial Condition Report

#### **Qualified Opinion**

We have audited the following Solvency II Quantitative Reporting Templates ("QRTs") contained in Annex I to Commission Implementing Regulation (EU) No 2015/2452 of 2 December 2015, of Universal Life Insurance Public Company Limited (the "Company"), prepared as at 31 December 2020:

- S.02.01.02 Balance sheet
- S.12.01.02 Life and Health SLT Technical Provisions
- S.17.01.02 Non-Life Technical Provisions
- S.23.01.01 Own funds
- S.25.01.21 Solvency Capital Requirement for undertakings on Standard Formula
- S.28.02.01 Minimum Capital Requirement Both life and non-life insurance activity

The above QRTs are collectively referred to for the remainder of this report as "the relevant QRTs of the Solvency and Financial Condition Report".

In our opinion, except for the possible effects of the matter described in the Basis for Qualified Opinion section of our report, the information in the relevant QRTs of the Solvency and Financial Condition Report as at 31 December 2020 is prepared, in all material respects, in accordance with the Insurance and Reinsurance Services and other Related Issues Law of 2016, the Commission Delegated Regulation (EU) 2015/35, the Commission Delegated Regulation (EU) 2016/467, the Commission Delegated Regulation (EU) 2019/981, the relevant EU Commission's Implementing Regulations and the relevant Orders of the Superintendent of Insurance (collectively "the Framework").

# Basis for Qualified Opinion

The investment properties presented in form S.02.01.02 – Balance sheet (Roo8o) include agricultural land fields which represent land inventory of a large size, which may be eligible for specialised development and exploitation. The valuations of these properties by an independent valuer encompassed an incremental uplift over and above the average prices of agricultural land fields observed in the areas, resulting in incremental value in the order of  $\mathfrak{C}6,6$  million. Due to the lack of comparable transactions of land fields of similar size and development prospects and in the absence, at present, of a unified master plan and related financial models in order to secure a planning permission for these developments, we were unable to obtain sufficient and appropriate audit evidence to determine whether any adjustments were necessary in relation to these assumptions and the resulting incremental value.

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the relevant QRTs of the Solvency and Financial Condition Report* section of our report. We are independent of the Company in accordance with the *International Ethics Standards Board for Accountants' International Code of Ethics for Professional Accountants (including International Independence Standards) (IESBA Code)* together with the ethical requirements that are relevant to our audit of the relevant QRTs of the Solvency and Financial Condition Report in Cyprus, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our qualified opinion.

#### **Emphasis of Matter**

We draw attention to the 'Valuation for solvency purposes' and the 'Capital Management' and other relevant disclosures sections of the Solvency and Financial Condition Report, which describe the basis of preparation. The Solvency and Financial Condition Report is prepared in compliance with the Framework, and therefore in accordance with a special purpose financial reporting framework. As a result, the Solvency and Financial Condition Report may not be suitable for another purpose. Our opinion is not modified in respect of this matter.

#### Other information

The Board of Directors is responsible for the Other information. The Other information comprises certain narrative sections and certain QRTs of the Solvency and Financial Condition Report as listed below:

#### Narrative sections:

- Business and performance
- Valuation for solvency purposes
- Capital management

QRTs (contained in Annex I to Commission Implementing Regulation (EU) No 2015/2452 of 2 December 2015):

- S.05.01.02 Premiums, claims and expenses by line of business
- S.05.02.01 Premiums, claims and expenses by country
- S.19.01.21 Non-Life insurance claims

Our opinion on the relevant QRTs of the Solvency and Financial Condition Report does not cover the Other information listed above and we do not express any form of assurance conclusion thereon.

In connection with our audit of the Solvency and Financial Condition Report, our responsibility is to read the Other information and, in doing so, consider whether the Other information is materially inconsistent with the relevant elements of the Solvency and Financial Condition Report, or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this Other information, we are required to report that fact. As described in the Basis for Qualified Opinion section above, we were unable to obtain sufficient and appropriate evidence to determine whether any adjustments were necessary in relation to specific assumptions and the resulting incremental value with regards to certain investment properties. Accordingly, we are unable to conclude whether or not the other information is materially misstated with respect to this matter.

# Responsibilities of the Board of Directors for the Solvency and Financial Condition Report

The Board of Directors is responsible for the preparation of the Solvency and Financial Condition Report in accordance with the Framework.

The Board of Directors is also responsible for such internal control as the Board of Directors determines is necessary to enable the preparation of a Solvency and Financial Condition Report that is free from material misstatement, whether due to fraud or error.

In preparing the Solvency and Financial Condition Report, the Board of Directors is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Board of Directors is responsible for overseeing the Company's financial reporting process.

# Auditor's Responsibilities for the Audit of the relevant QRTs of the Solvency and Financial Condition Report

Our objectives are to obtain reasonable assurance about whether the relevant QRTs of the Solvency and Financial Condition Report are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but it is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the Solvency and Financial Condition Report.

As part of an audit in accordance with ISAs, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the relevant QRTs of the Solvency and Financial Condition Report, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of the basis of preparation used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors.
- Conclude on the appropriateness of the Board of Directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the Solvency and Financial Condition Report or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

We communicate with the Board of Directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

#### Other Matter

Our report is intended solely for the Board of Directors of the Company and should not be used by any other parties. We do not, in giving this opinion, accept or assume responsibility for any other purpose or to any other person to whose knowledge this report may come to.
