CYPRUS

American Medical Center

AMC offers a wide range of medical and surgical services that meet all patient needs. It collaborates with highly specialized healthcare professionals across multiple disciplines to provide comprehensive care, ensuring the best possible outcomes for patients. At AMC, every patient receives the highest level of healthcare at every stage of their illness. The doctors build relationships with patients based on trust and mutual communication, as the patient plays a decisive role in the decision-making process.

With three floors and a total area of 10,000 square meters, AMC includes 8 modern operating rooms and can accommodate up to 80 hospital beds. The helipad on the roof of the building is considered particularly important, which is used in cases of emergency, mainly during hours of traffic congestion on the roads.

As a Center of Excellence, it ensures that you will receive the highest quality of treatment and attention.

ISIS Clinic

ISIS Clinic is a distinguished private healthcare center in Cyprus, established in Nicosia in 2009 and specializing in gynecology and obstetrics. With more than 1,600 successful deliveries, the Clinic combines extensive clinical expertise with advanced medical technology and personalized patient care. Following its expansion to Limassol in 2021, ISIS Clinic continues to strengthen its presence in Cyprus, offering exceptional standards of specialized medical care.

Supported by a highly qualified multidisciplinary team of doctors, nurses, embryologists, and midwives, the Clinic embraces state-of-the-art technology, modern medical practices and rigorous standards of safety and quality. Every aspect of care is designed to provide patients with a discreet, personalized and exceptional healthcare experience.

Athens Medical Center

Founded in 1984 in Marousi, its mission has been to provide high-quality healthcare services in Greece. It has demonstrated strong growth, introduced new standards to the healthcare sector, and delivered services of a quality comparable to the most advanced medical institutions in Western Europe and the United States.

The Athens Medical Center consists of the General Clinic and the Athens Pediatric Center. It has 319 beds (including those of the Pediatric Center), supported by 19 operating rooms and a 24-bed Intensive Care Unit. Together with its fully equipped and expertly staffed laboratories, the hospital meets diagnostic and inpatient care needs for any medical case, 24 hours a day, 365 days a year.

Several departments of the Athens Medical Center are recognized as Reference Centers, Centers of Excellence, or Specialized Centers in Europe and worldwide. Indicatively, these include the Department of General, Laparoscopic, Bariatric, and Robotic Surgery; the Department of Hand and Upper Limb Surgery and Orthopedic Reconstructive Microsurgery; and the Breast Clinic (a full member of the international Breast Centers Network).

Interbalkan Medical Center

The Interbalkan Medical Center of Thessaloniki is the largest and most modern private hospital in Southeastern Europe.

Founded in 2000, it operates in an ultramodern 50,000 m² building distinguished by its unique ergonomics and aesthetic design. Within its facilities operate an autonomous General Hospital as well as a Pediatric Center, the only one of its kind in the private sector in Northern Greece. It has 383 hospital beds, more than 800 employees, and over 1,000 distinguished affiliated physicians across all specialties. Equipped with cutting-edge diagnostic technology—much of which is unique in the region—and maintaining constant readiness, it effectively manages even the most severe and urgent cases, around the clock, 365 days a year.

The affiliated physicians of the Interbalkan Medical Center of Thessaloniki are leading experts in all medical fields, selected for their scientific training and professionalism. Many of them have trained in the United States, Germany, and the United Kingdom, and they frequently participate in international medical congresses.

Among its key areas of excellence are Robotic Surgery, Cardiothoracic Surgery, Interventional Cardiology, Oncology with a fully structured Oncology Center, Neurosurgery, Interventional Neuroradiology, General Surgery, Orthopedics, Microsurgery, Plastic Surgery, and Assisted Reproduction – IVF.

GREECE

Athens Pediatric Center

The Pediatric Center of the Athens Medical Center, the first private pediatric clinic in Greece since 1982, provides comprehensive, high-quality healthcare services for children. It employs medical staff across all pediatric specialties and sub-specialties, specialized nursing personnel trained in pediatric care, and features state-of-the-art facilities and cutting-edge medical technology.

By offering integrated services through the operation of general, maternity, and pediatric clinics, it collaborates with a network of 2,800 distinguished doctors and employs approximately 3,000 full-time staff.

Equipped with the most advanced technology, its departments serve as International Reference Centers, both for the innovative procedures performed and for the training they provide—training that is recognized by the global scientific community.

Psychiko Clinic

The Psychiko Clinic joined the Athens Medical Group in October 1997, with the aim of providing immediate access to high-standard medical services and hospital care, in another densely populated area in the heart of Athens, as guaranteed by the Group.

The physicians affiliated with the Clinic are of high scientific caliber, as evidenced by their extensive service in internationally recognized centers abroad and in Greece, as well as by their academic credentials. They cover all medical specialties and are available on a 24-hour basis.

Psychiko Clinic has 119 beds, 6 fully equipped operating rooms, and a versatile 10-bed Intensive Care Unit, staffed by experienced and well-trained medical and nursing personnel, ready to safely manage even the most complex cases and ensure a high level of care. Its laboratory and diagnostic equipment is comprehensive and state-of-the-art, suitable for conducting even the most specialized examinations. The fully equipped departments guarantee comprehensive medical support for both diagnosis and treatment.

International Oncology Centre Thessaloniki

The state-of-the-art International Oncology Center operates according to standards comparable to the world's leading oncology centers, offering holistic care to each patient—from early diagnosis and personalized treatment to continuous follow-up—in ultramodern, specially designed spaces that ensure both safety and aesthetic comfort.

The International Oncology Center is a meeting point of medical science, technology, and empathy, providing comprehensive care for every patient. Distinguished physicians, leading researchers, and specialized nurses create an ecosystem that integrates laboratory, diagnostic, and surgical services to manage all types of cancer effectively, reflecting the 25 years of experience of the Interbalkan Medical Center in holistic oncology patient care.

It is the first recognized Center for Stereotactic Radiosurgery & Stereotactic Body Radiation Therapy in Northern Greece, delivering highly precise, radical, targeted treatments for benign and malignant tumors of the brain and central nervous system, as well as primary or metastatic tumors in the lungs, pancreas, liver, spine, and other locations.

It is the first fully private hospital facility in Northern Greece specialized in the surgical management of all surgically treatable cancers, employing innovative techniques through laparoscopic, robotic, and minimally invasive surgery.

Iaso

IASO was founded in 1996 in Athens by a group of obstetricians and gynecologists and has evolved into one of the largest private hospitals in Greece and Europe in the field of obstetrics and gynecology.

Over the following decades, it expanded with new clinics such as IASO Children and IASO Thessaly. At the same time, it strengthened its technological infrastructure with state-of-the-art units, including advanced Intensive Care Units (ICUs), a 3-Tesla MRI scanner, and modern operating rooms. It is staffed by leading doctors across all specialties and serves as a model for providing high-quality healthcare services to men and women of all ages.

The IASO (Obstetrics & Gynecology Hospital) has a total of 486 inpatient beds, including those at IASO, IASO Children, and the Adult, Pediatric, and Neonatal Intensive Care Units. Regarding surgical facilities, it has 4 fully equipped operating rooms and an additional 6 endoscopy rooms for diagnostic or minimally invasive procedures. Furthermore, the IASO General Clinic (a separate unit within the group) has 237 beds and 11 operating rooms within its own infrastructure.

Lefkos Stavros - The Athens Clinic

Lefkos Stavros - The Athens Clinic is located in the Ilisia area of Athens. Since 1953, it has evolved with dedication, professionalism, and vision, resulting in a clinic that provides hospitalized patients and outpatients with the highest possible quality of medical care on a daily basis.

The clinic features state-of-the-art, modern facilities, advanced diagnostic and surgical equipment, highly qualified doctors, and a well-trained, experienced nursing and administrative staff.

It operates day-care units, diagnostic departments (Radiology, CT and MRI Scanning, Ultrasound Imaging and Vascular Examination, Biopathology and Cardiology Laboratories, Endoscopy), as well as specialized treatment units such as the Dialysis Unit and Extracorporeal Lithotripsy.

Euroclinic of Athens

The Euroclinic of Athens is one of the most modern diagnostic, surgical, and therapeutic centers in Athens. Since its establishment in 1998, it has consistently played a leading role in the private healthcare sector and has become a benchmark for high-quality service delivery and its patient-centered philosophy. This approach places particular emphasis on personalized and individualized clinical care, as well as on the comprehensive service of patients.

The clinic features advanced infrastructure supporting a wide range of medical services. Specifically, it includes approximately 175 inpatient beds, 12 of which belong to the Intensive Care Unit, while also operating a specialized cardiac care unit for heart attack patients with 4 beds. In addition, it has 8 modern operating theaters, fully equipped to handle complex surgical procedures.

Furthermore, the Euroclinic of Athens comprises specialized medical departments, such as cardiac surgery and thoracic surgery, and utilizes cutting-edge technologies, including robotic surgery with the Da Vinci system. In this way, a high level of medical care and innovation is ensured, further strengthening its position in the private healthcare sector in Greece.
